EDUCATION

Universitas Gunadarma

September 2021 – August 2025

- Bachelor of Informatics, GPA: 3.85/4.00

Bangkit Academy

February 2024 – July 2024

- Machine Learning Specialization (Graduated with Distinction)

EXPERIENCE

IT Intern (ML and Data Science) – PT Astra Visteon Indonesia

June 2026 – Present

- Developing an unsupervised predictive maintenance system for industrial air compressors using 150K+ telemetry records, enabling early anomaly detection in manufacturing operations.
- Engineered an ensemble anomaly detection pipeline (Rule-Based, Isolation Forest, LSTM Autoencoder) that reduced false-positive rates by 45% for industrial air compressor telemetry.
- Performed EDA, feature engineering, model evaluation, and threshold optimization, reducing false-positive alerts by over 50%.

AI Engineer – HPC Universitas Gunadarma (HPC-UG) (Part-time)

September 2024 – Present

- Built an AI laboratory assistant by fine-tuning Qwen3-8B with PEFT and QLoRA, integrated into a production-ready RAG chatbot with FastAPI, Qwen2.5-VL OCR, and hybrid retrieval (Qdrant + BM25).
- Published peer-reviewed research applying deep learning (CoralNet, InceptionV3, MobileNetV2) to automate coral bleaching detection, achieving 89% accuracy to support marine biodiversity monitoring.
- Deployed distributed AI workloads on NVIDIA DGX-1 and DGX A100 with infrastructure teams using Docker.

PROJECTS

InvenioAI (RAG-Based Enterprise Document Intelligence Platform)

January 2026 – May 2026

- Built and deployed an enterprise document intelligence platform enabling semantic search and question answering using Retrieval-Augmented Generation (RAG), FastAPI, LangChain, LlamaParse, Qdrant, and Docker.
- Engineered a hybrid retrieval and reranking pipeline with FastAPI, integrating Qdrant and BM25 to ensure low-latency, high-accuracy responses for large-scale enterprise datasets.

Omnius (AI-powered Media Intelligence Platform)

April 2026 – May 2026

- Developed an AI-powered media intelligence platform using Llama 3.3, Qwen3, FastAPI, Pydantic AI, Docker, and Microsoft Azure for automated news analysis and intelligence extraction.
- Built AI agents for news retrieval and relevance assessment, alongside LLM-powered framing, bias, and sentiment analysis, deployed as scalable AI services on Microsoft Azure.

LUCIAN (Lung Carcinoma Histopathology Imaging & Analysis)

January 2026 – March 2026

- Built a lung cancer histopathology classification system using ConvNeXt-Base, achieving 93.67% accuracy and providing clinicians with Grad-CAM visual explainability for diagnostic support.

SKILLS

- Programming:** Python, SQL, FastAPI, REST APIs, Git, Docker, Pandas, NumPy, React.
- AI & Machine Learning:** Machine Learning, Deep Learning, NLP, Computer Vision, LLMs, Generative AI, Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering, PEFT, QLoRA.
- Frameworks & Tools:** PyTorch, TensorFlow, Scikit-learn, Hugging Face Transformers, LangChain, LlamaIndex, Pydantic AI, XGBoost, Qdrant, FAISS.
- Cloud & MLOps:** Docker, Microsoft Azure, Google Cloud Platform (GCP), CI/CD, MLOps.
- Languages:** Bahasa Indonesia (Native), English (Professional Proficiency, TOEFL ITP: 650).

CERTIFICATIONS

BNSP Certification for Associate Data Scientist – BNSP

September 2025

TensorFlow: Data and Deployment Specialization – DeepLearning.AI

May 2024

DeepLearning.AI TensorFlow Developer – DeepLearning.AI

April 2024

Machine Learning Specialization – Stanford University

March 2024

SQL Server for Intermediate – Universitas Gunadarma

February 2024
